

# TradeFundrr Futures Page

Flow map, top to bottom | <pages/futures.html> | storytelling draft, blue theme | June 1, 2026

## Awareness read

This page is built for **problem-aware** and **solution-aware** traders and walks them toward product-aware. It is **not optimized for a hyper-aware (most-aware)** buyer: four sections of education and agitation run before any price appears. The page only shifts to most-aware (proof + close) at the very bottom. That is by design (Christian's storytelling direction) and fits **cold traffic**. If traffic is warm (brand searches, retargeting, email), consider a fast-track variant with price, terms, and CTA above the fold.

## Section-by-section flow

| #      | Section          | Eyebrow / Headline / Role                                                                                                                                                                                                                                                                                | Awareness           |
|--------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| 0<br>1 | Hero             | <p><b>You've got the setups. You just need the size.</b></p> <p>"\$100K in simulated futures buying power. Your evaluation starts at \$129."</p> <p>The anchor. A big number (100K) paired with a low entry (\$129), one CTA, and the futures terminal visual. Hooks the reader before any argument.</p> | Solution-aware      |
| 0<br>2 | Proof ticker     | <p>(scrolling strip)</p> <p>"NinjaTrader &amp; Tradovate, evals from \$129, weekly payouts, \$100K sim, T3 path, 4.3 stars"</p> <p>Fast credibility under the hero. Six proof points on loop.</p>                                                                                                        | Trust glue          |
| 0<br>3 | The Truth        | <p><b>The truth most futures traders figure out too late</b></p> <p>"You're trading a couple of micros. Maybe one mini."</p> <p>Names the small-account pain: too small to size up safely, so you over-leverage and one fast move wipes you out.</p>                                                     | Problem-aware       |
| 0<br>4 | Capital Gap      | <p><b>The retail trader's hidden handicap, exposed</b></p> <p>"Something is quietly destroying your gains."</p> <p>Reframes the cause: not your emotions, strategy, or experience, it's a capital gap. \$5K vs \$100K side-by-side.</p>                                                                  | Problem to Solution |
| 0<br>5 | Time Tax         | <p><b>The retail trader's time tax, exposed</b></p> <p>"Most traders quit before it gets good."</p> <p>Agitates the runway cost: years grinding a small account up, with the 40 / 80 / 93% dropout stats. Skip the grind.</p>                                                                            | Problem-aware       |
| 0<br>6 | Downside, Capped | <p><b>The real cost of trading your own money</b></p> <p>"Your downside, capped."</p> <p>Risk reframe: \$129 known cost vs 'Everything' on the line. Turns fear into a fixed, measured number.</p>                                                                                                       | Solution-aware      |

| #  | Section                | Eyebrow / Headline / Role                                                                                                                                                                                                                      | Awareness      |
|----|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| 07 | Audience / Positioning | <p><b>Built for the futures day trader</b><br/> <i>"Funded futures is crowded. Most of it ends in sim."</i></p> <p>Positions against the field (Topstep / Apex style): them = sim ceiling, shifting rules; us = real T3 live-capital path.</p> | Solution-aware |
| 08 | How It Works           | <p><b>How it works</b><br/> <i>"Pick a plan, trade, get paid."</i></p> <p>Three steps: pick Express or Growth (from \$129), trade a simulated \$100K on NinjaTrader/Tradovate, get paid weekly then earn T3.</p>                               | Product-aware  |
| 09 | Programs               | <p><b>Three programs, pick your path</b><br/> <i>"\$100K futures funded accounts, laid out in full."</i></p> <p>Growth / Express / Pro Trader cards + a plain-terms fee breakdown (initial, activation, reset, \$19 promo).</p>                | Product-aware  |
| 10 | The Big 5              | <p><b>Growth vs Express, the big 5</b><br/> <i>"Same account. Five real differences."</i></p> <p>Side-by-side: signup cost, path to funded, reset fee, lifetime cap, first payout. Shared items called out separately.</p>                     | Product-aware  |
| 11 | FAQ                    | <p><b>The questions traders actually ask</b><br/> <i>"Straight answers. No fine print."</i></p> <p>Objection handling: trading rules, 30% consistency, payout caps, sim vs real capital, T3 graduation, 'is this a scam', first payout.</p>    | Product-aware  |
| 12 | Business Model         | <p><b>The business model, transparent on purpose</b><br/> <i>"Where the payouts actually come from."</i></p> <p>Builds trust by explaining the model: eval fees fund the winners; the real upside is graduating top traders to T3.</p>         | Product-aware  |
| 13 | T3 Partner             | <p><b>The institutional partner, T3 Global</b><br/> <i>"Built on real institutional infrastructure."</i></p> <p>Credibility + the T3 Global vs T3 Trading Group distinction, with the SEC / FINRA / SIPC compliance framing.</p>               | Product-aware  |
| 14 | Reviews                | <p><b>Real traders, real payouts</b><br/> <i>"Don't just take our word for it."</i></p> <p>Verified Trustpilot reviews (4.3 stars). Generic-worded only, no fabricated futures testimonials.</p>                                               | Most-aware     |
| 15 | Platforms              | <p><b>Platforms, trade your way</b><br/> <i>"Two platforms. One funded account."</i></p> <p>Feature cards for NinjaTrader and Tradovate. Switch anytime.</p>                                                                                   | Product-aware  |
| 16 | Who It's For           | <p><b>Is this right for you?</b><br/> <i>"TradeFundrr isn't for everyone."</i></p> <p>Self-selection: a for-you column vs a not-for-you column. Qualifies the buyer and filters tire-kickers.</p>                                              | Solution-aware |

| #      | Section           | Eyebrow / Headline / Role                                                                                                                                                                           | Awareness     |
|--------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| 1<br>7 | What Separates Us | <p>What separates TradeFundrr</p> <p><i>"Built on substance. Not marketing."</i></p> <p>Three differentiators (real rules / real graduation / real support) + the Christian Bose founder quote.</p> | Product-aware |
| 1<br>8 | Final CTA         | <p>It's time to make your move</p> <p><i>"Stop risking your savings. Start trading our capital."</i></p> <p>The close: a 4-step recap and the primary CTA buttons.</p>                              | Most-aware    |
| 1<br>9 | Footer            | <p>(legal + nav)</p> <p><i>"Disclosures, links, contact"</i></p> <p>Compliance disclosures (general, risk, CFTC hypothetical, testimonials), site nav, and contact details.</p>                     | Structural    |

Open confirms flagged on the page: profit split (80/20 marked 'confirm for futures' on the build sheet), weekly payout close-day/cutoff (TBD), and whether the Growth evaluation is single or multi-stage. Nav/footer still point to the old futures/index.html mirror; this page deploys at /pages/futures.
